## HENSON HONORS PROGRAM IN SCIENCE AND MATHEMATICS COURSE OFFERINGS

### **MATH 155.001H [3738]**

#### **Modern Statistics with Computer Analysis**

This course is designed to provide students with a solid foundation in modern statistics, including data collection, analysis, and interpretation. The course covers topics such as probability, random variables, and statistical inference. Students will learn to use computer software to analyze data and create statistical models. The course is suitable for students who are interested in careers in data science, business, or social sciences.

### **BIOL 215.010H (LEC) and BIOL 215.011H (LAB) [2726]**

#### **Anatomy and Physiology I**

This course is designed to provide students with a comprehensive understanding of human anatomy and physiology. The course covers the structure and function of the human body, including the skeletal, muscular, and circulatory systems. Students will learn to identify and describe the major organs and systems of the body. The course is suitable for students who are interested in careers in medicine, nursing, or health care.
